

# Demo: Real-Time Football Analysis with StreamTeam

Lukas Probst, Frederik Brix, Heiko Schuldt and Martin Rumo

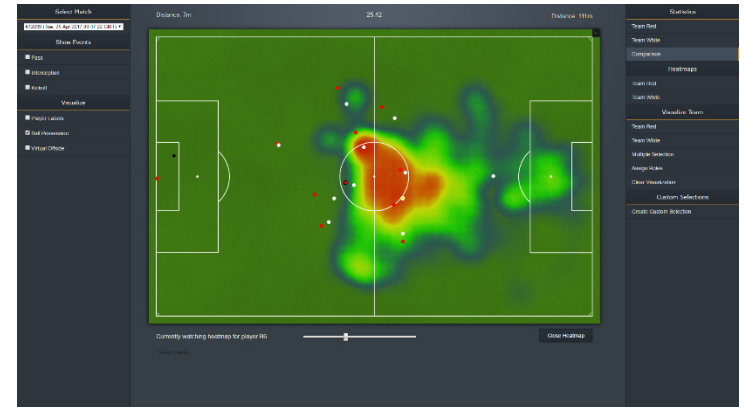

## Problem

I need to be able to dynamically adapt our tactics in order to win the FIFA World Cup 2018.

## The StreamTeam Approach

- Real-time team analysis based on raw position streams
- Complex team analyses instead of individual statistics

Great! StreamTeam can support me with real-time feedback and thus help me a lot.
